

UK Style Face Plate and Back Box

Description

Genius offers a wide selection of colored modular connectors to help identify the port to the workstation with the help of Faceplates and Wall Box. The housing of the connectors mounts flush with the front faceplate. This makes the outlet appear as one complete piece and aesthetically pleasing. Faceplates come with one, two & four port with shutter which can be configured with modular connectors for data-voice connectivity.

These Faceplates and Wall Box are made with tough ABS plastic for long-lasting use and comply with UL 94 plastics flammability standard.

Features

- UK style Keystone-type Faceplates are available in 1, 2 & 4 port configurations
- Faceplates are with shutter
- Flat & Angled type orientation with dimensions of 86x86mm cable entry at all side of Box
- Flat – 1,2 & 4 Port / Angular – 2 Port
- Snap out front cover
- Work with both Flush and Wall mount box
- Orientation of Keystone marked on each port of Cat6A, Cat6, UTP/STP, AV, FO.
- Faceplates includes write-on identification labels ad spaces for optional snap-in color service identification tabs, for easy identification of ports
