

# Field Termination Box

12F

**Genius** Fiber Terminal Boxes are used for splitting/termination of fiber service connection in locations like multi dwelling units and small offices, where the port counts are low to moderate. Separate access with individual lock and key doors are provided for cable termination and splice (input) areas to restrict customer access. The box is made from high quality plastic. This is a perfect cost-effective solution in the FTTx networks for both indoor and outdoor environments.

## Key Features

- Supports reliable FTTH, CATV, and PON networks
- Provision for cable anchoring; cable straps included
- Inbuilt Splice Holder
- Radius controlled cable routing with cable reeler
- Separate access to cable and splice tray areas
- IP65-rated for dust-tight and water-jet protection
- Provision available for mid-span access
- Compliance with RoHS
- Genius Network Brand Performance warranty for 25 Years

## Product Specification

Number of Ports	12 Nos.
